@ POLIMI

The IoT is eating the world, with some risks ...

Politecnico di Milano

May 5, 2016 – 17:00

Sala Conferenze - DEIB

Giulio Coraggio,
Giulia Zappaterra

DLA PIPER

The Internet of Things is leading to a revolution in the model of business of companies. But such change brings also "never experienced" legal issues. Likewise data are the "money maker" of the Internet of Things, but might be a "ticking bomb" for the business of companies for the potential liabilities that might trigger. How to get the best of the IoT minimizing the potential risk?

POLITECNICO
MILANO 1863

Where: Politecnico di Milano – Sala Conferenze DEIB, via Ponzio 34/5
