

# PEoPLe@DEIB presentation

November 13 | 5.15 pm | Room EL0

**We are happy to invite you to the presentation of "PEoPLe@DEIB: Politecnico Experiences on Passionate Learning".**

This project aims to offer students an environment where they can **work and experiment a motivating experience.**

We believe that a **close connection between research and education** should be pursued to adequately prepare our students: research can obtain great benefits from teaching and the other way around and this principle is at the basis of all the PEoPLe@DEIB activities.

This project, which is part of the innovative teaching program by Politecnico di Milano, involves many **courses, competitions and events** focused on some aspects of the engineering world (and not only!) and proposed in the late afternoon, evening and weekends in a way that will not impact the normal academic activities (this is one of the reasons why we included "**Passionate**" in our slogan).
