

Experience 5G-CRESCA

Discover how 5G is shaping the future of connected innovation.

Join us as the **5G-CRESCA project** opens its doors to present the first results of its activities – deploying a **5G campus network** designed to enable **eight cutting-edge use cases** across the **education, healthcare, industrial, and advanced services** sectors.

During the event, participants will:

- Hear directly from project partners about the vision and implementation plan.
- Experience **live demos** showcasing the initial use cases in action.

Supported by the **European Union's Connecting Europe Facility (CEF) – Digital**, 5G-CRESCA represents a major step forward in advancing **innovative and connected digital services** in academic and research environments through 5G technology.

The project brings together **Vodafone Italy**, the **University of Milan**, **MADE Competence Center**, the **IRCCS Ca' Granda Foundation**, and the **Violin Museum of Cremona**, with the goal of creating a **hybrid private 5G network** across their campuses and facilities.

A **networking cocktail** will follow the event.

29th October 2025
5:00 - 7:00 pm
Emilio Gatti Room,
Building 20,
Politecnico di Milano
Via Ponzio 34/5, Milan
