

**POLITECNICO**  
MILANO 1863

DIPARTIMENTO DI ELETTRONICA INFORMAZIONE E BIOINGEGNERIA

Milano, March 20, 2018

The *Dipartimento di Elettronica, Informazione e Bioingegneria*, DEIB, of the *Politecnico di Milano* (see [www.deib.polimi.it](http://www.deib.polimi.it) for more information) has recently undertaken a strategy of internationalization of its own Faculty. As part of this general effort, we are in the process of collecting applications (expressions of interest) for positions of Associate Professor in our Department. Eligible candidates must hold a passport other than Italian (this may include double citizenships), and the associate professorship should be in a research area that is covered by our Department. In particular:

- Automation and Control
- Bioengineering
- Computer Science
- Electrical and Electronic Engineering
- Telecommunications

Preference will be given to candidates that already hold a position of Associate Professor in a University outside of Italy. Alternatively, the candidate must apply for and be granted the qualification (“Abilitazione Nazionale”) for Associate Professor in an Italian University from the Italian Ministry of Instruction, University and Research (MIUR) at the earliest evaluation round. Information on the “Abilitazione Nazionale” procedure can be found at: <http://abilitazione.miur.it/public/index.php?lang=eng>

Successful candidates will be asked to actively contribute to the activities of the Department in terms of

- a) Research: by exercising their leadership in the definition, promotion and coordination of research projects from Industry as well as National or International funding Agencies; and by disseminating their scientific results through high-profile publications.
- b) Teaching: by holding courses (at Bachelor and/or Master level) up to 120 hrs/yr. Candidates will also be encouraged to contribute to didactic activities for Ph.D. and extension programs.

The initial annual gross salary of 51.000€ will increase progressively based on seniority, but can also be augmented significantly through project research activities.

For further information, please contact the Director of the Department, Prof. Stefano Tubaro ([stefano.tubaro@polimi.it](mailto:stefano.tubaro@polimi.it)).

Applications must be sent via email to [eoideib@polimi.it](mailto:eoideib@polimi.it), and must include a complete CV, a brief description of the candidate’s research interests, and a letter describing the candidate’s vision of how to contribute to the activities of the Department.

Applications must be received by May 20, 2018.

Prof. Stefano Tubaro  
Director of the  
Dipartimento di Elettronica Informazione e Bioingegneria  
Politecnico di Milano  
(DEIB-PoliMi)
